- 8:40AM – 9:15 AM **A Case in Point: Creating Opportunities and Connections in Chickasaw County**
Chickasaw Country lacked a true fiber-based broadband provider for far too long. Trace Fiber Networks (TFN), a wholly owned subsidiary of the Chickasaw Nation (CN), changed that by installing a ‘future-proof’ fiber network in its communities. TFN’s initial project included a middle mile network, which began operation in 2020 and is now the backbone of its efforts to connect the 30 communities it serves. TFN’s fiber network is essential to enabling residents to take advantage of quality of life-enhancing resources, such as Telehealth services and remote employment opportunities. This panel will discuss how the team at TFN worked collaboratively with Tribal leaders and community leaders, as well as other partners, to bridge the technology gap that is negatively affecting the small towns and rural communities.

Federal and State Funding: Taking Nothing for Granted

NTIA BEAD, FCC ACP, and other federal and state funding programs will help network operators and Tribal Nations stretch their networks further and faster. How can operators best leverage these opportunities through the grant process and get access to the funds each needs to expand its footprint, reach more customers, and overcome challenges along the way? This panel will dive into the grant process, sharing tips, tricks, and best practices based on what's worked, what hasn't, and what each expects as new funding opportunities emerge.

Moderator: Claudia Tarbell, Senior Manager, Field Marketing, Tribal & Indigenous Communities, Calix

- 1:45PM – 2:30PM **Deployment Challenges and Opportunities: Tribal Considerations and Expectations**
Broadband deployment on Tribal lands creates a unique set of challenges and opportunities for Tribal nations that are building and deploying their own networks or forming a partnership with one or more other entities, including other Tribes or other commercial providers. Providers wishing to develop broadband infrastructure on Tribal lands must secure rights-of-way to lay their lines. This panel of Tribal broadband experts will uncover sustainable paths forward to connect Tribal communities with fiber broadband in accordance with individual nation laws and customs.
